AUDIENCE

LA Energy Officers and Climate
Action Officers
Facilities & Fleet Managers
Procurement Managers

Energy – A summary of key legislative obligations and requirements

A recap and summary of the key legislative obligations and targets relating to energy efficiency and climate action for Local Authorities.

SEAI in conjunction with the Association of Irish Energy Agencies (AIEA) run an annual programme of events for the Local Authority Sector in Ireland covering topics that are of interest to LA's.

We will kick off the 2023 programme with a recap of all current key legislative and policy obligations on Local Authorities (and all public bodies) with respect to energy efficiency and climate action. We will also briefly look at impending EU legislation in this area.
